

MODEL #00975 & 00976

Plato P-Tablet Arm Chair

DESIGN:

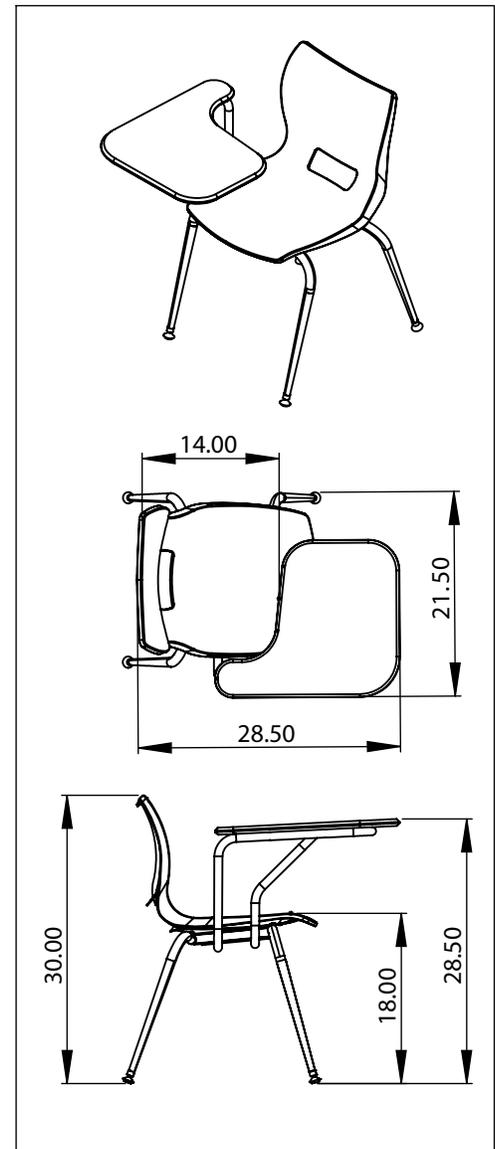

The Plato Chair is a posture demanding chair based on the Euro Spec. The Plato offers a wide seat pan and a lumbar support designed to comply with current anthropometric data for improved ergonomics..

MATERIALS:

The chair frame is constructed of 1" x 18-gauge tubing that is chrome plated for a long lasting durable finish and is capped off with our durable nylon base swivel glides (steel and felt available). The shell is attached to 16 gauge brackets via a metal to metal steel riveted connection.

The P-Tablet Attachment is constructed from a 7/8" diameter x 16 gauge steel tubing frame attached to a 12 gauge steel plate with a chrome finish. The P-Tablet frame is securely fastened to the steel chair frame using 4 machine screws. The laminated top is made of 3/4" thick high density particle board with your choice of laminate and t-mold color. The laminate P-Tablet top fastens securely to the frame using 8 wood screws through clamps. The 'belly room' gap between the Tablet and seat back is roughly 14". *Please note this measurement can be adjusted to your preference on site at installation. Optional book rack could be mounted under seat (Model #17234).
