6. UXL 'P-Tablet' Arm Frame

7. Pre-Drilled P-Tablet Top

# UXL P-Tablet Chair Directions

Step 1: Flip the chair upside down and locate the P-Tablet Arm sandwich plate. Look carefully at the sandwich plates and note which side labeled top and bottom as well as which direction the arrow points to indicate 'Front'.

(A) The Chair is marked underneath the seat with a 'Front' marking:

(B) Locate the piece of the sandwich plate labeled 'Front Top' and slide it under the chair frame.

(1) The label on the 'Front Top' plate should be placed as shown below:

(C) Locate the piece of the sandwich plate labeled 'Front Bottom'.

(1) Place this plate on top of the 'Front Top' plate and 'finger' tighten the M8x35mm Nyloc bolts with a 6mm Allen key.

(2) Be sure that the words 'Front Bottom' are visible on the bottom of the chair. Also be sure that your arrow points toward the Front Arrow Marking on your Chair..

(D) Place your 3/4" P-Tablet top laminate side down on a clean, dry surface. Place the P-Tablet Arm on the Tablet Top. Locate the (3) top attachment brackets and line them up with the pre-drilled holes. With the holes lined up; attach the brackets to the top with the (12) 3/16" x 5/8" wood screws.

(E) With the sandwich plate 'finger tight'; and the P-Tablet top attached to the Arm., slide the P-Tablet Arm into the sandwich plate until the two small "Alignment dots" are pressed against the Bracket as shown below;

\*Alignment Dots\*

(F) Torque the (2) M8x35mm Nyloc bolts to 25ftlbs.

(G) This completes the assembly of your P-Tablet Chair and the product is now ready for use
