

MODEL #17097

I~O Tower (8-Lower Outlets)

DESIGN:

The I~O Tower is an effortless solution bringing power to classrooms and libraries. This taller option is ideal for stool height or standing applications. Connect the I~O Tower to your power source from the ground or ceiling using a single cable from the I~O Tower for every 8 outlets installed. group any of our desks around it to make a complete learning center.

MATERIALS:

Total of 4 UL Listed, single circuit 2 power receptacles (total of 8 outlets) linked to one 72" cord, terminated with a standard plug allowing connection into any standard wall socket.

Electrical cord is rated for 12A at 125V. Suggested rating per outlet not to exceed 180 watts per outlet, if all outlets are being used simultaneously. Please refer to equipment power supply for specific power output.

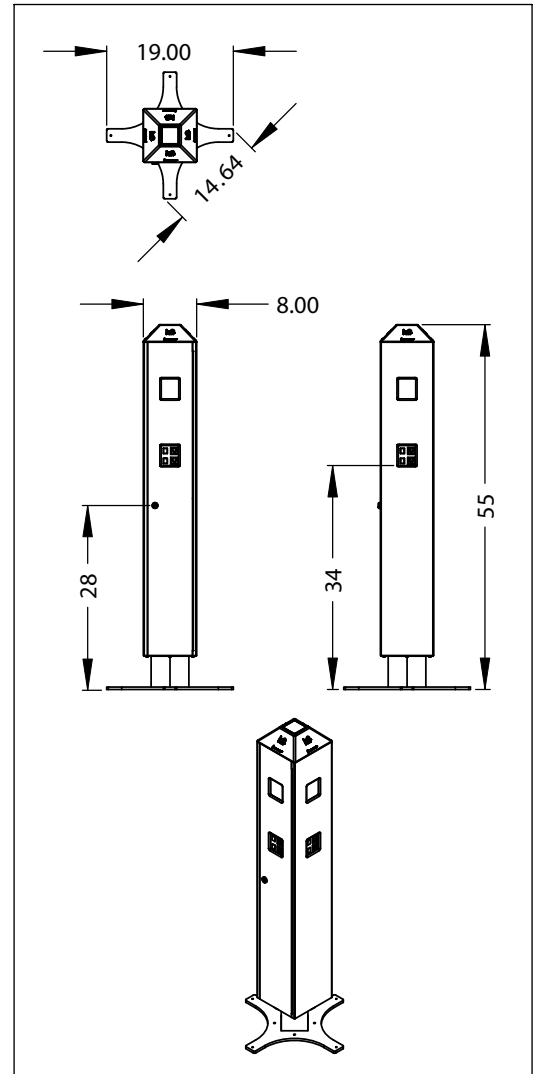

$$\text{AMPS} = \text{WATTS} / \text{VOLTS} \quad \text{WATTS} = \text{AMPS} \times \text{VOLTS}$$

The ABS plastic cap features a discreet removable plug to route cabling through a power pole (not included) to the ceiling as an option. The cap itself is fastened to the housing using machine screws from the inside, invisible to the outside.

The 8" x 8" square housing is 14-gauge steel with a full length hinged door for comfortable access if ever needed. Power units are neatly recessed and mechanically fastened to the housing. Cam lock key is included for security.

The welded heavy 19" x 19" x 5" plate steel base attaches to the housing using 4 bolts. The base has two possible orientations, 90° (shown) and 45°. The 45° orientation is intended to accommodate different table configurations. 4 leveling glides are included and the base includes four holes for permanent floor anchoring if preferred. Optional 17098 I~O Post USB Power Supply Kit available.
