OVERVIEW:

The UXL Table is built for today's education environment. The UXL line offers high schools and colleges a complete, integrated system for outfitting the entire school, from classrooms to commons.

MATERIALS:

The 3/4" or 1 1/4" thick **WORK SURFACE** consists of a 45 lb density particle board core with a 0.030" high pressure laminated surface and a 0.020" melamine backer sheet. The edge of the work surface features a t-mold edge that is mechanically fastened to the underside of the work surface every 6 to 8 inches to assure a long lasting fit.

The **FRAME** is attached to the pre-drilled holes in the top. The legs fasten into the frame at each corner. The table frame comes fully assembled requiring only two bolts per leg to complete installation. The table frame is a box tube design made of aircraft grade aluminum to reduce weight, while being very stable and sturdy. The 16-gauge steel legs are 2" diameter and power coated for a long lasting durable finish. UXL Legs are available in 8 different configurations.
