OVERVIEW:
The UXL line offers high schools and colleges a complete, integrated system for outfitting the entire school, from classrooms to commons.

MATERIALS:
The 3/4" or 1 1/4" thick **WORK SURFACE** consists of a 45 lb density particle board core with a 0.030" high pressure laminated surface and a 0.020" melamine backer sheet. The edge of the work surface features edge molding that is mechanically fastened to the underside of the work surface every 6 to 8 inches to assure a long lasting fit.

The frame is attached to the pre-drilled holes in the top with #10 x 5/8" screws. The legs then fasten into the frame at each corner. The frame comes fully assembled requiring only two bolts per leg to complete installation. The table frame is a boxed tube design made of aircraft grade aluminum to reduce weight, while being very stable and sturdy. The 16-gauge steel legs are 2" diameter and powder coated for a long lasting durable finish. Legs are available in different configurations, see chart.
