OVERVIEW

The mechanism for height adjustment uses two dog point hex screws per side which allows the table to adjust from 26"-36" in height in one inch increments with rock solid Smith System quality. Chrome tubing is welded to a powder-coated t-base which accents the upper structure for an updated design.

MATERIALS

The 1 1/4" thick work surface consists of a 45 lb density particle board core with a 0,030" high pressure laminated surface and a 0.020" backer sheet. The edge of the work surface features t-mold that is stapled to the underside of the work surface every 6" - 8". The table top is pre-drilled to attach legs using included fasteners.

The main frame is constructed of 2" diameter x 16-gauge round cold-rolled tubular steel that is welded to an ingenious mechanism that allows the table top to fold down and back into place easily. The substantial upper legs are made of 1.5" diameter x 14-gauge twin tube cold-rolled steel while the lower legs are constructed of chrome plated cold rolled steel. Comes with 3" dual-wheel casters for easy mobility and storage.

Standard Laminate Options

Want to specify a different laminate?

No problem. If you have 20 or more tops of the same color -60 or -38 there is no upcharge. Have 20 or less? We can quote for you with the Wilsonart code and – finish style. We can specify other laminates – call to inquire and get a quote.

Suggested Standard Laminates:

Classic Standard Laminates:

All 13 of the standard laminates are -60 finish, if you need to match a laminate from a previous year, please let us know on your order (example Pewter Mesh 4878-38, our standard is -60).

When the WilsonArt Laminate code includes a "Y", "K", "-12" "-78", "Aeon" etc, these are special laminates with an upcharge, even when it contains -38 or -60.
