

Model#: 30935

#### OVERVIEW

Smith System Cascade series totes with housing provides storage for a wide variety of items in today's classroom. The tote trays can be transferred to work areas or stored in a central location using one of our Cascade storage units.

#### MATERIALS

The tote housing is formed from one piece of 18 gauge steel powder coated for a long lasting durable finish. The totes are made of durable, recyclable and virtually indestructible ABS plastic, allowing the contents to be easily identified. The side rails, also made of ABS plastic, are designed to glide and tilt the tote with ease and hold the tote in the tilted open position. The side rails are mechanically riveted to the steel housing using steel rivets.

The tote housing is attached to the work surface using high-performance Hi-Low screws for increased pull-out resistance.
