

Model # Shown: 4101T

### OVERVIEW

The Interchange Science Tables have a rejuvenated look with our Interchange Ellipse leg sets. The tables offer a stable work surface for the classroom and is ideal for science and STEM classrooms. Interchange tables match the look and style of Interchange student desks for a uniform look in the classroom.

### MATERIALS

Trespa® TopLab® PLUS provides an ideal choice. Thanks to its unique closed surface composition, the product shows significantly low dirt pick up, is impervious to mold and rot and is resistant to non-abrasive organic cleaning solvents thus making the product easy to clean and disinfect.

The 1/2" thick work surface consists of Trespa® TopLab® PLUS material, which is resistant to a large number of aggressive chemicals as identified by SEFA (Scientific Equipment and Furniture Association) and PSI (Professional Services Industries), if cleaned within 24 hours. Trespa® TopLab® PLUS has inherent anti-bacterial properties without the addition of microbial additives. An independent test by British Industrial Microbiological Services Ltd. (IMSL) shows an almost complete elimination of certain bacteria after 24 hours.

Tops are pre-drilled for leg set attachment and ease of installation. Tables and legs are supported by one or more 2" x 3" channels with four breakovers for optimum strength.
