

Model # Shown: 06001

OVERVIEW

Constellate group tables are the perfect fit for any collaborative learning environment. Students need spaces for group study and project work, oftentimes in libraries or other common areas. Group tables service this need perfectly while being sturdy and scratch-resistant to ensure they last. Casters on one end of the table allow it to be lifted like a wheelbarrow for easy mobility. An optional external hook can also be added.

MATERIALS

The Constellate Group Table features 3/4" particle board with HPL laminate for the main body, ensuring a smooth finish and resistance to scratches. Supported by a sturdy frame of 14-gauge steel tubing and reinforced with two stiffeners made of 14-gauge tube steel. Nylon-inserted glides on the tubing facilitate seamless movement while protecting floors.
