

### OVERVIEW

With a sleek, modern design that integrates seamlessly with existing classroom furniture, the ADA Hard Plastic Student Desk supports inclusivity, functionality, and long-lasting performance in any educational setting.

### MATERIALS

The 14-gauge steel leg set is attached to the pre-drilled holes in the top with (12) screws. Legs consist of 1-1/4" square steel tube uppers, welded to a 1" square stretcher, with 1" square tube inserts for height adjustment. Height adjustment for each leg is secured with (2) 3/8-16 x 5/8" dog point set screws. There is also a 6" high 18-gauge steel modesty panel that connects to the legs with (4) 1/4-20 connector bolts, and to the top with (4) screws. Legs come standard with nylon base leveling glides.

ADA COMPLIANT at 28.5"H and up.

\*Adding totes or book box eliminates ADA compliance.

Both sides of the leg set include Smith System's patented backpack peg.
