

OVERVIEW

The Constellate Display Shelf is thoughtfully engineered to fit securely on top of existing shelves or any flat surface, offering flexibility without the need for major reconfiguration. It features a grippy foam base that prevents slipping for temporary setups, as well as an included hardware pack that allows for permanent installation when desired.

MATERIALS

The shelf is constructed from durable 18-gauge cold-rolled steel with 16-gauge cold-rolled steel brackets for added strength and stability. Slip-resistant foam along all horizontal contact surfaces protects the finish and prevents movement. Optional mounting hardware is included for permanent installation on sheet metal, wood, or laminate surfaces.

COLOR OPTIONS:

PLATINUM
